“Make your Career / Business Fly with Drones”

GETTING STARTED

Welcome to India's best Drone services & Drone Training company - **DRONITECH & IAD.**

Drones were once considered a hobby possession but has now transformed into a must-have gadget known for its versatility and worthiness. That's one of the best thing ever happened. With less human operation and no safety infrastructure, drones can reduce time and costs. The drone market is growing steadily in the consumer, commercial, and military sectors. In a 2016 report, Goldman Sachs estimated that drone technologies will reach a total market size of \$100 billion between 2016 and 2020.

DRONITECH is the leader in drone training, consultation, and expert support for new drone pilots. We believe that drones are going to change the world and we are using this amazing technology by promoting safety, comprehensive understanding of the equipment, and knowledge of the current regulations.

Get hands-on flight training and learn responsible flying!
